

ABSTRACT

~~1. Microdosing device and method for dosing small liquid quantities.~~

~~2.1.~~ A microdosing device with a dosing chamber for the at least temporary reception of a liquid quantity, and with which is associated at least one discharge opening is provided. ~~as well as with a~~ A vibrating unit in operative connection with at least one boundary surface of the dosing chamber is provided in order to vibrate the same for a discharge process, and with a delivery function unit connected to the vibrating unit for activating the latter during a delivery time period ~~is known.~~ ~~2.2.~~ According to the invention ~~a~~ A drying function unit is additionally provided and can be activated in time-separated manner with respect to the delivery function unit in order to free the dosing chamber from liquid residues.

~~2.3.~~ Use for a microatomizer for pharmaceutical applications.
